## About me.

I am a Frontend Developer. I am developing projects on Javascript and React. I also specialize in CSS, Html and Bootstrap. I am currently doing an internship at Softalya Software Inc. My internship ends in June and I am graduating from my school. During my internship, I developed a website for myself and completed many projects. I do not see an end in self-development and I want to constantly improve myself. I am a disciplined person who follows innovations closely and keeps up with the modern age. I wish you good work!

## Reference.

### Ketut Susilo

CEO | Ingoude Company

P : +123-456-7890
